

Find nearby fuel stations quickly and easily using CODAB's smartphone app TapNet Tanka. Open the app and enter your PIN code at the terminal to access and pay for refueling.

### No need to issue and handle actual fueling cards

When your users have the CODAB app, no actual cards need to be managed. Instead, a mobile phone number is connected to the "card" in TapNet. Users won't need to carry yet another customer card. All they need to bring is their phone.

### Transaction history

The complete transaction history is available from within the CODAB app. It is no longer a problem if a receipt goes missing or can't be printed.

### Find stations and refuel

In TapNet Tanka you can browse nearby stations or search for and get directions to a specific station.

At the station, you open the app and confirm refueling with a PIN code at the terminal.

### Technical requirements

CODAB's smartphone app is available for both iOS (10.0 or higher) and Android (6.0 or higher) and can be downloaded from either App Store or Google Play.
